

MODULAR, FLEXIBLE - SIMPLY VEMAG

VEMAG offers flexible and simple solutions for small and medium-sized businesses, to portion and process a wide variety of masses with highest weight accuracy.

The VEMAG HP1 is a reliable and robust machine for the butcher's trade. With the filling machine and the interchangeable attachments, it is easy to bring a broad and high-quality product range to the sales counter.

The combination of the HP1 vacuum filler and variably interchangeable attachments enables the production of a wide range of meat and sausage products. The HP1 continuously supplies the modular attachments with the mass. Thanks to the special feeding technology, it can portion various masses with different consistencies and viscosities gently and weight accurately.

The HP1 is an extremely reliable and robust machine and the perfect partner both for the daily linking of sausage products and for the exact dosing and portioning of various masses.

ADVANTAGES

- High flexibility thanks to interchangeable attachments
- Gentle processing of soft or stiff masses - even with inclusions
- Highest weight accuracy
- Low residual quantities and fast product changes
- Easy maintenance and operation
- Small footprint thanks to compact design
- Easy and fast cleaning
